

# DOMINATING THE CLOUD

has never, ever, ever, been easier

## **SpringBoard™ turns the Cloud into your Project Management servant.**

They say “never say never,” but trust us – there’s never, ever been a Project Management tool quite like the *SpringBoard Cloud portal*, only from LOADSPRING™.

Think of *SpringBoard* as your digital gateway to the Cloud. It gives you total access to your Project Management software, data and collaborations worldwide. It’s fast, secure and so intuitive even an adult can figure it out.

*SpringBoard* delivers 200+ Project Management applications, with instant access to project status, licensing, user training and more. It’s all kept humming by unified support from the top Project Management Cloud solutions provider on the planet. (That would be us.)

## **Smart technologies, backed by even smarter humans**

We cleverly designed *SpringBoard* portal using the latest Cloud-enabling resources for greater Project Management efficiency and higher ROI. To that end, we can build your infrastructure platform in minutes, then get your Perfect Cloud customized in just days. (This is not a misprint.)

## **Connect and Conquer**

*SpringBoard* is the ideal connection to your Perfect Cloud—your applications, your integrations, your disaster recovery. The customizable dashboard gives you all the up-to-the-nanosecond information you need for better business decisions NOW.

Your teams can work on any hosted application, input data, keep an eye on project development and get our standard-setting global support—all in a single location. Top features include:

**SpringBoardInsight** tool lets executive and management leaders access and view critical data simultaneously from multiple applications – all through *SpringBoard's* easy-to-use control panel. Your custom data warehouse.

**GlobalView Reporting** monitors productivity by showing who's located where, and which applications they're using. It all makes for better planning, easier license tracking and some serious cost control.

**Real-time Geosite Mapping** lets you see not only which programs your team is using, but what applications they're working on, no matter where on Earth they happen to be.

**LOADSPRING Academy** is our online virtual campus, built right into *SpringBoard*. It has 100+ preloaded tutorials and quizzes that simplify software user training and improve adoption rates.

**Impenetrable Security** includes SSAE 16 SOC 2 Type II certification and other measures (by “other measures” we mean “none of your darn business, you miserable hackers”). The result is total security for your priceless project info.

**Integrated SmartSupport** gives every user the power to resolve issues on the fly, through their trusty *SpringBoard* portal. Available 24/7/365, of course.

**Self Registration** puts the onus on individual users to sign themselves up, which saves time, hassle and the sanity of your overworked administrators.

**LoadSpringMobile** simplifies the dashboard on itty bitty mobile devices. Users see only what they need and nothing that they don't. Projects are updated smoothly and in real time from the field too.

## What's your Perfect Cloud?

Finding your ideal Cloud is easier than you think, provided you follow a few basic steps:

**1. Partner with Cloud experts** who specialize in Project Management and know your business. Someone who can get you to the Cloud and stay with you. Someone like, well...LOADSPRING.

- Cloud-based Project Management solutions are our only business. LOADSPRING leads the industry in complex Project Management applications, integrations and infrastructure.
- LOADSPRING has over 3,000 global customers and serves every imaginable industry.
- The Top 20 Engineering, Design and Construction firms trust their data, software and Project Management processes to LOADSPRING\*.
- Our integration solutions connect to your most important business systems, quickly and hassle-free.

**2. Pick the right Cloud environment** from *SpringBoard's* four distinct options.

- **SpringBoard Essentials.** Shared infrastructure with secure databases—all with industry-leading global unified support, backup and recovery.
- **SpringBoard Private Cloud.** All the Cloud's most important elements, tailored to fit your enterprise like a proverbial glove. Our dedicated network infrastructure gives you near real-time support and advanced access to your integrations.
- **SpringBoard Power Cloud.** Our triple-caffeinated performance-based Cloud, designed for serious high-activity projects.
- **SpringBoard Global Cloud.** All your Project Management data, neatly synchronized in real time with all your worldwide teams.

**3. Select your applications.**

- LOADSPRING hosts all the top manufacturers such as Oracle, Deltek, Meridian, Microsoft, Autodesk and dozens more.
- Every software category is represented, such as BIM, business intelligence, contract/document management, estimating, geospatial, scheduling and other specialized tools.
- LOADSPRING obsessively tests and re-tests each application for security, effectiveness, compatibility and stability—no unwanted surprises here.
- For those still running legacy or specialty titles, we host those too.

**4. Finalize** by adding the custom LOADSPRING solutions that fit your business best:

- **C&I – Configuration & Implementation** customizes your software configurations, reporting and training. Our accelerated implementation process effortlessly folds complex Project Management applications into your daily workflow.
- **ECM – Enterprise Customer Management** dedicates a resource team to manage your infrastructure, support, IMAC's and performance, while reviewing your processes, emergency responses and Key Performance Indicators.
- **Auto Archive** keeps musty old surplus data stored safely away from your active projects for better speed and responsiveness.
- **APM – Advanced Performance Management** continually oversees your system's health and makes intelligent recommendations. You'll be assigned a living, breathing human performance manager to evaluate your system and report back to you.

With *SpringBoard*, you can look forward to better efficiencies, faster business decisions and higher ROI than you'll find anywhere else.

In other words, you'll never, ever, ever have to settle for less

**Fast, easy, mobile. Now.**
