

The Tech Leader's Project Health Assessment

Hidden Risks in Your Tech Stack: Could They Be Derailing Projects?

As technology leaders, we often focus on innovation and implementation—but may miss how our foundational tech decisions affect day-to-day project execution. Our work with hundreds of enterprise IT departments revealed that seemingly minor tech environment issues can cascade into significant project delays and failures. This short assessment identifies common blind spots that might be affecting your project outcomes.

Instructions:

Check all that apply to your current project technology environment, then score yourself using the key below. This quick assessment will tell you if your tech strategy may be contributing to project failure—without you even knowing it.

	Check
1. Our project data is centralized, clean, and accessible in real time.	<input type="checkbox"/>
2. Core applications across departments and projects are fully integrated.	<input type="checkbox"/>
3. New tech tools are deployed and adopted quickly and deliver value within weeks.	<input type="checkbox"/>
4. Leadership and field teams have real-time visibility into project status.	<input type="checkbox"/>
5. Security, compliance, and governance are built into our cloud platform.	<input type="checkbox"/>
6. We've moved critical systems off legacy infrastructure and into the cloud.	<input type="checkbox"/>
7. Our data environment is AI-ready and supports predictive analytics.	<input type="checkbox"/>
8. We've reduced tool sprawl and have centralized control over app access.	<input type="checkbox"/>
9. Our infrastructure scales as project demands grow.	<input type="checkbox"/>
10. We have a tested disaster recovery and business continuity plan in place.	<input type="checkbox"/>

Score Yourself:

- **8–10 Checked:** You're operating with a resilient, scalable, cloud-forward strategy. Congrats and keep optimizing.
- **5–7 Checked:** You're in good shape—but there are cracks to address. Prioritize fixes before they cost you.
- **0–4 Checked:** Time to reassess. Your tech environment is likely undermining project outcomes.

Next Step:

If your score was on the lower end, don't wait for project failure to make improvements. Connect with our team to assess your current tech environment and get personalized recommendations for improvement.
